Introduction:

Sumo Didactic is a company dedicated to the manufacture of elements for psychomotor education and child safety.

Since 1992 the company **Sumo Didactic SL** has been very present in the school, nursery and sports facilities sectors in a very steady, continuous way and with a clear objective, to satisfy the needs of our customers with high quality products, attractive designs and competitive prices.

The possibilities for participatory games are endless. The characteristics of flexibility, strength, lightness and safety make these items suitable for nurseries, schools, special schools and sports centres find them to be their best auxiliaries. Our products are guaranteed for 2 years under normal conditions of use.

Commitment to quality standards

At **Sumo Didactic** our commitment to continuous improvement is reflected in the introduction and implementation of an integrated quality system that covers all areas of our business.

The implementation of this system means our products are manufactured through a production control system. In this way we fulfil the European requirements for safety in our products based on the **UNE-EN71** (Physical and mechanical properties, flammability, migration of chemical elements) and the respective **CE** labelling.

Likewise, the quality of all our processes is controlled with the implementation of the **UNE-EN ISO 9001:2008**. These ensure that the technical, administrative and human factors are consistent with the quality requirements of our customers.

Under the same circumstances we are endorsed by the implementation of an environmental management system under the international standard **UNE-EN ISO 14001:2004**. At Sumo Didactic we comply with the strictest quality standards in production, processes, and minimising the environmental impact.

All measurements are given as length x width x height.

FABRICS:

PVC coated polyester Mate

Bright

Leather feel

Technical qualities

Fabrics

The vinyl fabric we use to manufacture of our products is designed to meet the highest requirements of today's modern market.

- Antimicrobial protection,
- Antibacterial protection,
- Antifungal protection
- High resistance to abrasion,
- Resistance to perspiration and human saliva
- Resistance to urine,
- Resistance to blood
- Total weight: 620 g/m²
- Thickness: 0.5 mm to 1 mm,
- Meets the **REACH** regulation
- Fireproof material classification m2
- Complies with **EN71-3** Toy Safety.

SUN EXPOSURE

After exposure for a total of 309 hours, roughly equivalent to about 2.5 years, the results are excellent according to tests carried out in a certified laboratory.

CLEANING

- Wash with mild soap and water.
- Rinse with clean water.
- Dry with a soft cloth.

Foams

Technical qualities of the foam we use in our products: Both polyurethane foams and polyethylene foams are normalised and meet the highest standards of European legislation, both technically and environmentally.

All **Sumo Didactic** products have been designed based on the different tests that have been carried out over a minimum period of 6 months in our collaborating centres. We thank the teachers of these institutions for their work and their know-how contribution for the improvement and innovation of our products.

Certificates

6-18 months

Psychomotor

The elements of SUMO DIDACTIC psychomotor education favour coordination development. They stimulate their imagination and they get familiarised with the composition of volumes and colours. With Sumo elements anything is possible, crawl, balance, slide, move, go up, go down and jump on the different circuits that can be built, forming waves, ramps, stairs ...

All with the total safety and guarantee that Sumo products offer. The polyurethane foam used is 25 kg/m³, the most appropriate for a child's weight, which is PVC polyester coated or leather feel, and in a wide range of colours.

Mosaic Obstacles

DIFFERENT DENSITIES AND FEELS

Mosaic Pieces

* Order of the dimensions: length x width x height

Mosaic of activities

SET 48

Leather feel
150 x 150 x 15 cm - Ref 267

Set of 7 pieces
and 1 obstacle:

- 2 u. - Ref 415
- 1 u. - Ref 420
- 1 u. - Ref 419
- 1 u. - Ref 416
- 1 u. - Ref 411
- 1 u. - Ref 405D

SET 22

Leather feel
200 x 150 x 15 cm
Ref 268

Set of 9 pieces
and 3 obstacles:

- 1 u. - Ref 420 (2 pcs.)
- 1 u. - Ref 415
- 1 u. - Ref 417 (2 pcs.)
- 2 u. - Ref 419
- 1 u. - Ref 421
- 1 u. - Ref 416
- 3 u. - Ref 405

The obstacle pieces with different feels, sizes, shapes and hardness favour the stimulation of skills and touch. These are assembled on mosaic pieces using a Velcro system, which is easily interchangeable.

Very dynamic sets with multiple combinations, any piece of the set fits into another so we can make a different circuit everyday with the same pieces. .

FEATURES	Braid nylon mesh 3 x 3. Red made of high tenacity braided rope.	Made of polyurethane foam 25 kg PVC polyester coated 620 gr / m2, M2 fire retardant. Velcro on all four sides.	High density foam, coated with PVC. Adhesive inside.	High density foam, PVC coated, flame retardant. Adhesive.
LEGISLATION	High tenacity multifilament.	Foam: According to the European directive EN71-3 . According to the environmental certification Oeko-Tex® Standard 100 . Polyester PVC: EN71 regulations consistent with European directive on toy safety.		
QUALITIES	Great resistance.	● Safety and comfort inside the home.	● The edges of the fire box are perfectly protected. ● The protection allows the box to be opened. ● Vey installation.	Avoid accidental bumps and the possibility of objects falling inside.
INSTALLATION	It is usually installed with self-locking plastic ties.	It fastens easily to the cot with a Velcro system.	1. Clean the area where you are going to install. 2. Withdraw the self-adhesive film and stick by pressing hard.	Set the lock on the wall with screws and plugs.
