**Village** is Italtrike solution for teaching the fundamental rules of Road Safety to children!

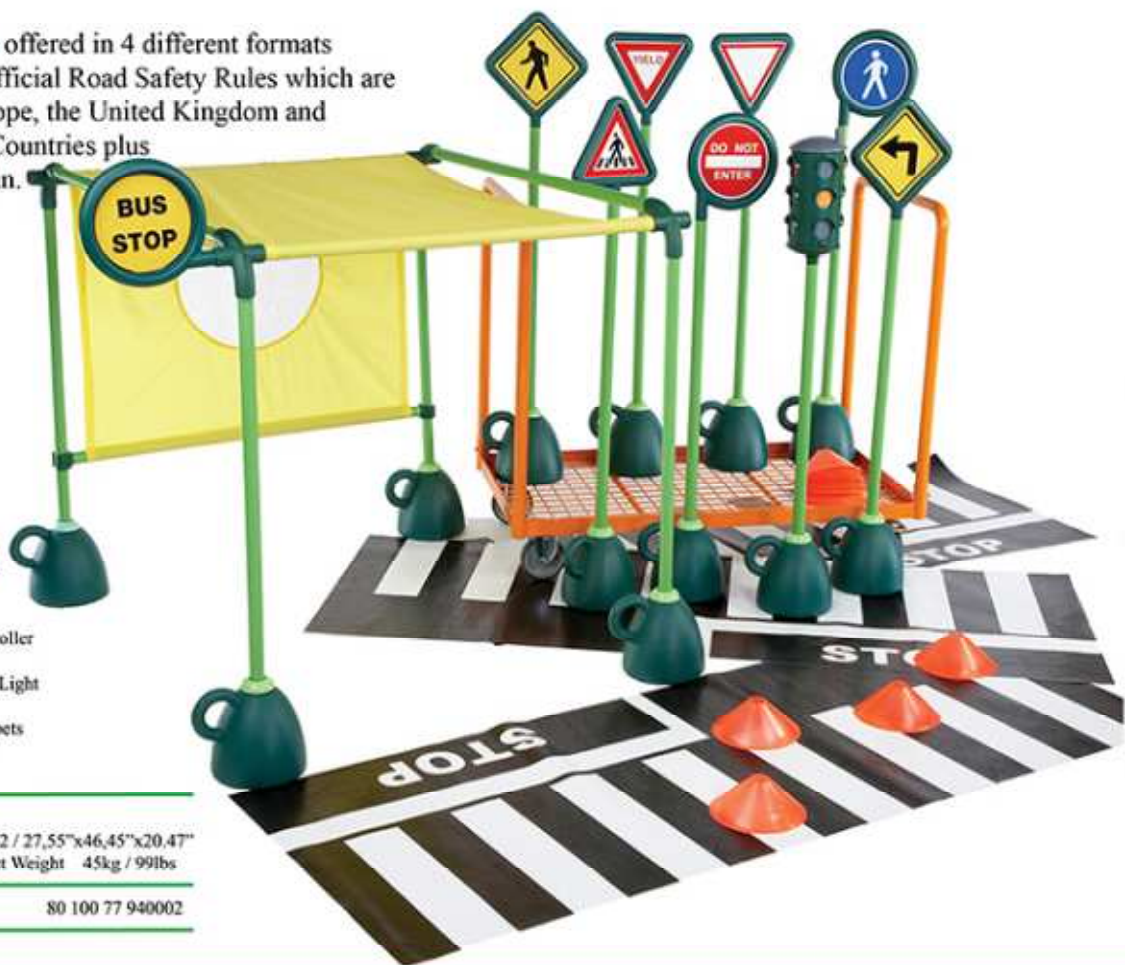

The teaching of these rules can be broken down into distinct phases.

- 1) In the classroom working through the 54 images included on a DVD.
  - 2) Outdoor where practical work can begin by constructing and using a roadway circuit.
- Children are therefore given the opportunity to put into practice what they have learnt in the classroom. The equipment supplied includes 9 official road signs, 1 working traffic light (which children can operate themselves) 3 rubber zebra crossing carpets, 1 bus shelter and 30 cones.

They can create road circuits which represent their everyday environments on the school playground or where there is sufficient safe space available.

All the materials are supplied on a 4 wheeled trolley which allows easy and safe transportation to different locations. All components have been designed to meet the highest standards of quality and safety.

**Village** is offered in 4 different formats to represent the official Road Safety Rules which are applicable in Europe, the United Kingdom and Commonwealth Countries plus the USA and Japan.

**VILLAGE**

**alutrike**

COMMERCIAL ALUMINIUM COLLECTION

### Aluminum is Light !

Compared to similar sized steel tricycles, Alutrike® is 30-35% lighter. This enables children to steer the tricycles more easily and provides a more comfortable ride.

### Aluminum Does Not Rust !

When painted steel is scratched, rust will appear. With Alutrike® your tricycle will be rust free forever. Great for areas near saltwater air.

### Aluminum is Strong !

New compounds of Aluminum have been developed providing greater level of strenght. Additionally Alutrike® has designed an exclusive aluminum extruded profile for its tricycle frames. The parts are hand welded by skilled, highly experienced craftsmen.

### Aluminum is High Tech !

Aluminum is currently used in many high tech fields. Italtrike® has taken their extensive knowledge and experience from the bicycle manufacturing field where all premium frames are made using this fantastic material.

ALUTRIKE

# Pilot Series

Regional Community design n° 303495/03-000  
Copyright Pilomat 2006

The Pilot Series is Italtrike most comprehensive line. Smaller size tricycles in the Pilot 100 Series are the perfect fit for toddlers aged 1-2 years, while preschoolers graduate, age 2-4 years, to the standard sized Pilot 200 Series and finally, Pilot 300 Series for girls and boys, age 4-6 years.

This new commercial tricycle line has a distinctive European feel that enables you to select the tricycle that best fits a child's development stage. These high quality tricycles offer all the features required to meet the high demands of child care setting; commercial grade steel, durable finishes, outstanding workmanship, and a great design which eliminates any possible pinch point.

It meets all latest ASTM, CPSC, and CE Standards. Replacement parts are readily available. Frame has a 5 years warranty.

PILOT SERIES

## Pilot 100 - Blue Trikes

Children start to learn functions and new movements of their body. It is important they start to ride on a vehicle and have their first run. Pedalling is not yet for everybody; but they can start to move just by using their feet on the ground.

**Pilot 100** is a line dedicated to beginners age 1 to 2 years old. Walker for one and two children, a first Tricycle and a 3 wheels Scooter to become confident to new actions. A good start in absolute safety and comfort.

PILOT 100

## Pilot 200 - Orange Trikes

Pilot 200 is a line for children age 2 to 4 years old.

At this age, children are more confident of their own capabilities and they need more appropriate vehicles.

A tricycle to ride alone and discover the freedom to move around, and a tricycle for 2, to ride a friend around.

A 2 wheels Scooter to improve equilibrium and capability to run.
